OUR BUSINESS IS CHILD'S PLAY

We use a full set of test probes enabling us to test for compliance to meet all design and safety standards. We can assure our customers of the highest standards and compliance as we test all units ourselves before and after installation.

These images above depict the use of special gauges called probes, to test for areas that might pose the risk of head and neck entrapment.

The various probes used include torso, head, foot and hand probes and test for all possible problem areas on the play equipment.

Our factory based in Johannesburg South Africa is fully equipped to manufacture only the highest quality play equipment available today.

OUR BUSINESS IS CHILD'S PLAY

Specifications on materials used on our playgrounds

- *FRAMES (Steel primed and painted or hot dip galvanizing optional extra)*
